## Notes

NA - Not Available

NR - Not nationally reportable

CRS: Congenital Rubella Syndrome

\*2012 provisional data. *MMWR* 2011;60(51):1762-1775.

Prior to 1966, hepatitis A and B were not separated from other types of hepatitis. Prior to 1978, deaths from hepatitis A and B were not separated from deaths from other types of hepatitis.

Haemophilus (Hi) reporting includes all serotypes and all ages. In 2010, 23 cases of invasive Hi type b disease were reported among children younger than 5 years of age.

Varicella was removed from the nationally notifiable disease list in 1991. In 2010, varicella cases were reported from 38 states, the District of Columbia, Guam, and Puerto Rico.

### Sources:

Cases: Final totals of nationally reportable infectious diseases are reported in *Morbidity and Mortality Weekly Report (MMWR)*. Tables are published for the previous year in August or September of the following year. Final totals for 2010 were published in *MMWR* 2011;60(32):1089-1101. CDC also publishes a more comprehensive surveillance document, the annual *Summary of Notifiable Diseases*. The most current annual summary was published on May 13, 2011 for calendar year 2009. This document and annual summaries for previous years are available on the MMWR website at <http://www.cdc.gov/mmwr/>.

Deaths: National Center for Health Statistics Mortality Report for respective years.

20 January 2012
