

TITLE 24. EDUCATION
CHAPTER 1. PUBLIC SCHOOL CODE OF 1949
ARTICLE XIII. PUPILS AND ATTENDANCE
(A) ATTENDANCE

24 P.S. § 13-1303a (2007)

§ 13-1303a. Immunization required; penalty

(a) It shall be the duty of all school directors, superintendents, principals, or other persons in charge of any public, private, parochial, or other school including kindergarten, to ascertain that every child, prior to admission to school for the first time has been immunized, as the Secretary of Health may direct, against such diseases as shall appear on a list to be made and from time to time reviewed by the Advisory Health Board. All certificates of immunization shall be issued in accordance with the rules and regulations promulgated by the Secretary of Health with the sanction and advice of the Advisory Health Board.

(b) Any person who shall fail, neglect, or refuse to comply with, or who shall violate, any of the provisions or requirements of this section, except as hereinafter provided, shall, for every such offense, upon summary conviction thereof, be sentenced to pay a fine of not less than five dollars (\$ 5) nor more than one hundred dollars (\$ 100), and in default thereof, to undergo an imprisonment in the jail of the proper county for a period not exceeding sixty (60) days. All such fines shall be paid into the treasury of the school district.

(c) The provisions of this section shall not apply in the case of any child deemed to have a medical contraindication which may contraindicate immunization and so certified by a physician. Such certificates may be accepted in lieu of a certificate of immunization.

(d) The provisions of this section shall not apply in the case of any child whose parent or guardian objects in writing to such immunization on religious grounds.

TITLE 28. HEALTH AND SAFETY
CHAPTER 23. SCHOOL HEALTH
SUBCHAPTER C. IMMUNIZATION

28 Pa. Code. § 23.83 (2007)

§ 23.83. Immunization requirements.

(a) Required for entry. The following immunizations are required for entry into school for the first time at the kindergarten or first grade level, at public, private or parochial

schools in this Commonwealth, including special education and home education programs:

- (1) Hepatitis B. Three properly-spaced doses of hepatitis B vaccine or a history of hepatitis B immunity proved by laboratory testing.
- (2) Diphtheria. Four or more properly-spaced doses of diphtheria toxoid, which may be administered as a single antigen vaccine, in combination with tetanus toxoid or in combination with tetanus toxoid and pertussis vaccine. One dose shall be administered on or after the 4th birthday.
- (3) Tetanus. Four or more properly-spaced doses of tetanus toxoid, which may be administered as a single antigen vaccine, in combination with diphtheria toxoid or in combination with diphtheria toxoid and pertussis vaccine. One dose shall be administered on or after the 4th birthday.
- (4) Poliomyelitis. Three or more properly-spaced doses of any combination of oral polio vaccine or enhanced inactivated polio vaccine.
- (5) Measles (rubeola). Two properly-spaced doses of live attenuated measles vaccine, the first dose administered at 12 months of age or older, or a history of measles immunity proved by serological evidence showing antibody to measles as determined by the hemagglutination inhibition test or a comparable test. Each dose of measles vaccine may be administered as a single antigen vaccine.
- (6) German measles (rubella). One dose of live attenuated rubella vaccine, administered at 12 months of age or older or a history of rubella immunity proved by serological evidence showing antibody to rubella determined by the hemagglutination inhibition test or any comparable test. Rubella vaccine may be administered as a single antigen vaccine.
- (7) Mumps. One dose of live attenuated mumps vaccine, administered at 12 months of age or older or a physician diagnosis of mumps disease indicated by a written record signed by the physician or the physician's designee. Mumps vaccine may be administered as a single antigen vaccine.
- (8) Chickenpox (varicella). One of the following:
 - (i) One dose of varicella vaccine, administered at 12 months of age or older.
 - (ii) A history of chickenpox immunity proved by laboratory testing or a written statement of history of chickenpox disease from a parent, guardian or physician.

(b) Required for attendance. The following immunizations are required as a condition of attendance at school in this Commonwealth if the child has not received the immunizations required for school entry listed in subsection (a).

- (1) Diphtheria. Three or more properly spaced doses of diphtheria toxoid, which may be administered as a single antigen vaccine, in combination with tetanus toxoid or in combination with tetanus toxoid and pertussis vaccine.
- (2) Tetanus. Three or more properly spaced doses of tetanus toxoid, which may be administered as a single antigen vaccine, in combination with diphtheria toxoid or in combination with diphtheria toxoid and pertussis vaccine.
- (3) Poliomyelitis. Three or more properly spaced doses of either oral polio vaccine or enhanced inactivated polio vaccine. If a child received any doses of inactivated polio

vaccine administered prior to 1988, a fourth dose of inactivated polio vaccine is required.

(4) Measles (rubeola). Two properly spaced doses of live attenuated measles vaccine, administered at 12 months of age or older or a history of measles immunity proved by serological evidence showing antibody to measles determined by the hemagglutination inhibition test or a comparable test. Each dose of measles vaccine may be administered as a single antigen vaccine.

(5) German measles (rubella). One dose of live attenuated rubella vaccine, administered at 12 months of age or older or a history of rubella immunity proved by serological evidence showing antibody to rubella determined by the hemagglutination inhibition test or any comparable test. Rubella vaccine may be administered as a single antigen vaccine.

(6) Mumps. One dose of live attenuated mumps vaccine, administered at 12 months of age or older or a physician diagnosis of mumps disease indicated by a written record signed by the physician or the physician's designee. Mumps vaccine may be administered as a single antigen vaccine.

(c) Required for entry into 7th grade. In addition to the immunizations listed in subsection (b), the following immunizations are required at any public, private, parochial or vocational school in this Commonwealth, including special education and home education programs, as a condition of entry for students entering the 7th grade; or, in an ungraded class, for students in the school year that the student is 12 years of age:

(1) Hepatitis B. Three properly-spaced doses of hepatitis B vaccine or a history of hepatitis B immunity proved by laboratory testing.

(2) Chickenpox (varicella). One of the following:

(i) One dose of varicella vaccine, administered at 12 months of age or older.

(ii) Two properly-spaced doses of varicella vaccine for children 13 years of age and older.

(iii) A history of chickenpox immunity proved by laboratory testing, or a written statement of history of chickenpox disease from the parent, guardian, emancipated child or physician.

28 Pa. Code. § 23.84 (2007)

§ 23.84. Exemption from immunization.

(a) Medical exemption. Children need not be immunized if a physician or the physician's designee provides a written statement that immunization may be detrimental to the health of the child. When the physician determines that immunization is no longer detrimental to the health of the child, the child shall be immunized according to this subchapter.

(b) Religious exemption. Children need not be immunized if the parent, guardian or emancipated child objects in writing to the immunization on religious grounds or on the basis of a strong moral or ethical conviction similar to a religious belief.

TITLE 28. HEALTH AND SAFETY

CHAPTER 27. COMMUNICABLE AND NONCOMMUNICABLE DISEASES

SUBCHAPTER C. QUARANTINE AND ISOLATION

COMMUNICABLE DISEASES IN CHILDREN AND STAFF ATTENDING SCHOOLS AND CHILD CARE GROUP SETTINGS

28 Pa. Code. § 27.77 (2007)

§ 27.77. Immunization requirements for children in child care group settings.

(a) Caregiver responsibilities.

(1) Except as exempted in subsection (d), effective March 27, 2002, the caregiver at a child care group setting may not accept or retain a child 2 months of age or older at the setting, for more than 60 days, unless the caregiver has received a written objection to a child being vaccinated on religious grounds from a parent or guardian, or one of the following:

(i) For all children not exempt under subsection (d)(1)(ii), an initial written verification from a physician, the Department or a local health department of the dates (month, day and year) the child was administered any vaccines recommended by ACIP. The verification shall also specify any vaccination not given due to medical condition of the child and shall state whether the condition is temporary or permanent. The verification shall show compliance with the vaccination requirements in subsection (b).

(ii) For all children for whom vaccinations remain outstanding following the caregiver's receipt of the initial written verification, subsequent written verifications from a physician, the Department or a local health department as additional vaccinations become due. These verifications shall be prepared in the same manner as set forth in subparagraph (i), but need not repeat information contained in a previously submitted verification. The verifications shall demonstrate continuing compliance with the vaccination requirements in subsection (b).

(2) If the caregiver receives a written verification under paragraph (1) explaining that timely vaccination did not occur due to a temporary medical condition, the caregiver shall exclude the child from the child care group setting after an additional 30 days unless the caregiver receives, within that 30-day period, written verification from a physician, the Department or a local health department that the child was vaccinated or that the temporary medical condition still exists. If the caregiver receives a written verification that vaccination has not occurred because the temporary condition persists, the caregiver shall require the presentation of a new verification at 30-day intervals. If a verification is not received as required, the caregiver shall exclude the child from the child care group setting and not readmit the child until the caregiver receives a verification that meets the requirements of this section.

(3) The caregiver shall retain the written verification or objection referenced in paragraphs (1) and (2) for 60 days following the termination of the child's attendance.

(4) The caregiver shall ensure that a certificate of immunization is completed and signed for each child enrolled in the child care group setting. The certificates shall be updated by the caregiver to include the information provided to the caregiver under subsection (a) when that additional information is received. The immunization status of each enrolled child shall be summarized and reported on an annual basis to the Department at the time prescribed by the Department and on the form provided by the Department.

(b) Vaccination requirements. Each child enrolled in a child care group setting shall be immunized in accordance with ACIP standards in effect on January 1, 1999, governing the issuance of ACIP recommendations for the immunization of children.

(1) The standards are as follows:

(i) The immunization practice is supported by both published and unpublished scientific literature as a means to address the morbidity and mortality of the disease.

(ii) The labeling and packaging inserts for the immunizing agent are considered.

(iii) The immunizing agent is safe and effective.

(iv) The schedule for use of the immunizing agent is administratively feasible.

(2) The Department will deem an ACIP recommendation pertaining to the immunization of children to satisfy the standards in this subsection unless ACIP alters its standards for recommending immunizations for children by eliminating a standard set forth in this subsection and the recommendation is issued under those changed standards.

(c) Notice. The Department will place a notice in the Pennsylvania Bulletin listing publications containing ACIP recommendations issued under the standards in subsection (b). The Department will publish the initial notice at 32 Pa.B. 539 (January 26, 2002), contemporaneously with the adoption of amendments to this chapter. The Department will update that list in a notice which it will publish in the Pennsylvania Bulletin within 30 days after ACIP issues a recommendation which satisfies the criteria of this section.

(d) Exemptions.

(1) This section does not apply to the following:

(i) Kindergarten, elementary school or higher school. These caregivers shall comply with § § 23.81-23.87 (relating to immunization).

(ii) Children who are known by the caregiver to be 6 years of age or older or to attend a kindergarten, elementary school or high school.

(iii) A caregiver who does not serve as a caregiver for at least 40 hours during at least 1 month.

(2) The requirement imposed by subsection (a), to not accept a child into a child care group setting without receiving an initial written verification or objection specified in subsection (a), does not apply during a month the caregiver does not serve as a caregiver for at least 40 hours.

(e) Exclusion when disease is present. Whenever one of the diseases in § 27.76 (relating to exclusion and readmission of children, and staff having contact with children, in child care group settings) has been identified within a child care group setting, the Department or a local health department may order the exclusion from the child care group setting or any other child care group setting which is determined to be at high-risk of transmission of that disease, of an individual susceptible to that disease in accordance with public health standards as determined by the Department.
